

Our Studio

Meden Agan Studio, based in Los Angeles, specializes in high-end interior design for single-family homes, multi-family developments, student housing, creative offices, and mixed-use projects. Led by co-founders Belén and Maral, the studio combines branding expertise with comprehensive design services, tailored to each project's unique essence. With a focus on trust, innovation, and attention to detail, our dedicated team guides clients seamlessly from concept to completion, leveraging the latest technology and expert project management.

Our Philosophy

Our design philosophy, "Balance Is More," reflects both our name and values. Inspired by the Greek principle of *Meden Agan* (μηδὲν ἄγαν) — "Everything in moderation" — we believe that, with balance and intention, anything is possible. Our acronym, MAS, meaning "more" in Spanish, reminds us to pursue excellence and never settle.

Our mission is to create spaces that are balanced, soulful, and authentic. By enhancing each client's vision through a collaborative design process, we craft environments that inspire and elevate every experience.

Our Clients

Our clients trust us because we prioritize thoughtful, constructible design that saves time without compromising creativity or quality. We work closely with our clients, crafting budget-friendly and custom solutions that honor their unique vision while maintaining originality.

Beyond design, we leverage cutting-edge technology, including AI, 3D stills and 360 renderings in the early stages of development, to deliver unforgettable and innovative experiences.

Our team stands out for being hardworking, creative, and crafty, always pushing boundaries to get things done. We pride ourselves on being proactive problem-solvers, arriving with solutions before challenges arise. Partnering with us means collaborating with a group of passionate professionals dedicated to turning your ideas into exceptional results.
